

# CSRHub SASB Calculator

## Preparation and Reporting

## Your Guide to SASB Standards Preparation

### CSRHub SASB Calculator **saves time and money**

- ✓ Quickly and accurately test if you comply with the industry specific SASB disclosure framework. How will your company compare to your peers?
- ✓ Decide where to place focus. Scan topics and look for weak spots. See which sustainability areas you need to focus on now.
- ✓ Choose your own threshold. Do you want to be in step with your peers or be best in class? Set goals you can meet rather than absolute targets.
- ✓ Protect your brand. Make sure your company attracts praise instead of criticism. Avoid risks and take advantage of opportunities.

# Get Prepared for SASB Reporting

The Sustainability Accounting Standards Board (SASB), founded in 2011, created a framework for disclosing financially material ESG factors. They identified five broad dimensions across 77 industries, then selected the most relevant topics within the dimensions to ensure disclosures focus on material risks and opportunities. The standards help companies report issues that directly affect financial performance.

- 1 Strategic Clarity:** Quickly understand which issues drive financial performance in your industry. Benchmark against peers and competitors to identify strengths and blind spots.
- 2 Align Strategy with Investor Expectations:** Signal sustainability awareness and progress. Build confidence with stakeholders by communicating to stakeholders the relevant sustainability factors.
- 3 Get a Head Start:** Use the SASB materiality measures to map internal risks and data gaps, before reporting publicly. Reduce future compliance costs by setting up systems early.

# CSRHub Maps Its Ratings Data to the Industry Specific Framework

<b>CSRHub SASB - Auto Industry Mapping</b>				
Below is a mapping of CSRHub data to SASB-Auto Industry. The model was developed by our partner Valutus, under the title "Materiality Matters." You can learn more about Valutus and its work here <a href="https://valutus.com/">https://valutus.com/</a> .				
You can request a custom mapping via this form.				
<b>SASB Area Mapping for Auto Industry to CSRHub Scores</b>	<b>Community Dev &amp; Philanthropy</b>	<b>Human Rights &amp; Supply Chain</b>	<b>Product</b>	<b>Compensation &amp; Benefits</b>
Materials Efficiency and Recycling			20%	
Product Safety			75%	
Labor Relations				31%
Fuel Economy and Use-phase Emissions	5%		15%	
Materials Sourcing (including critical materials)		65%		

# CSRHUB Tool Shows You Where to Focus and Change

Is a specific topic material for your entity? The SASB Industry Calculators let you set a threshold.

SASB for Mining Industry Materiality Threshold Control						
Customize your SASB Materiality Level	80%					
SASB Compliance Results for Mining Industry						
Company Name	Greenhouse Gas Emissions	Air Quality	Water Management	Employee Health and Safety	Critical Incident Risk Management	Business Ethics & Payment Transparency
Tesla Motors, Inc.	49	45	47	50	44	45
Comparator Average	59	60	59	60	58	58
Materiality Test	Pass	Below	Below	Pass	Below	Below
Company Name	Biodiversity Impacts	Security, Human Rights, and the Rights of Indigenous Peoples	Community Relations	Reserves Valuation & Capital Expenditures	Management of the Legal & Regulatory Environment	
Tesla Motors, Inc.	46	44	46	44	45	
Comparator Average	60	58	58	55	57	
Materiality Test	Below	Below	Below	Pass	Below	

If you find yourself "below" the threshold, you can work to correct your performance on the issue or propose a lower threshold.
