Alignment, Preparation and Reporting

Your Guide to SDG Preparation and Alignment

CSRHub's SDG Calculator **saves time and money**

- ✓ Quickly and accurately test if you comply with the SDG voluntary framework. How will your company compare to your peers?
- ✓ Decide where to focus. Scan areas and look for weak spots. See which sustainability areas you need to focus on now.
- ✓ Choose your own threshold. Do you want to be in step with your peers or be best in class? Set goals you can meet rather than absolute targets.
- ✓ Protect your brand. Make sure your company attracts praise instead of criticism. Avoid risks and take advantage of opportunities.

SDG stands for Sustainable Development Goals. These are a set of 17 global goals adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet, and ensure peace and prosperity for all by 2030, according to the UNDP and the World Health Organization. The 17 SDGs are integrated; they recognize that action in one area will affect outcomes in others, and that development must balance social, economic and environmental sustainability.

1

Strategic Clarity: Your company receives an early understanding of where they align with the SDGs. This positions them to easily connect goals and priorities with global challenges like poverty, climate and inequality. After identifying which sustainability issues are most relevant, companies can reduce exposure to environmental and social risks.

2

Build Credibility with Better Reporting: Signal a commitment to recognized global targets. Communicate your alignment with sustainable development to stakeholders.

CSRHub Maps Its Ratings Data to the SDG Framework

CSRHub SDG Mapping
