CSRHub Function Documentation – Argument Codes & Examples

Examples of Function Arguments

An example for each type of argument on the function documentation sheet.

Argument	Example value	Explanation
cid	211524	A unique company identifier. Can be either CSRHub's internal ID (as in the example) or the company's official CSRHub name ("Cisco Systems, Inc.").
category	Governance	One of CSRHub's four categories. There is a tool in the CSRHub menu that lists them.
subcategory	Leadership Ethics	One of CSRHub's twelve subcategories. There is a tool in the CSRHub menu that lists them.
specialissue	Military Contractor	One of CSRHub's special issues. There is a tool in the CSRHub menu that lists them.
city	San Jose	The company's city. Because city names are ambiguous, they must be paired with a country name.
state	CA	The company's state. US companies use the standard two letter abbreviations per the US postal system.
country	USA	The company's country. There is a tool in the CSRHub menu that lists them.
region	North America	The company's region. There is a tool in the CSRHub menu that lists them.
industry	Networking Equipment	The company's industry. There is a tool in the CSRHub menu that lists them.
indgroup	Technology	The company's industry group. There is a tool in the CSRHub menu that lists them.
dsn	Glassdoor	The name of a data source.
flag	Calvert Index	The name of a flag.
dse	Glassdoor Employer Ratings	The name of a data element that is in a data source. Because data element names may be duplicated, they must be paired with a data source name.
order	1	Some functions allow the inclusion of a parameter (e.g., primary industry is returned when order is 1, secondary when order is 2).
pid	1103	This is a user's profile number. This can be obtained by <code>~/api/v3/profile:current</code> API call.
date	2022-12-01	This is a data set date. The format must be MM/DD/YYYY.
website	www.cisco.com	A company url can be preceded or not by http:\ or https:\
ticker	CSCO	The company's short ticker (no exchange code appended).
dstype	esg-analysts	Name of datasource type.
alltype	index	Name of alternative datasource type.

Argument codes	
Argument	Definition
category	The name of one of CSRHub's four rating categories.
cid	Company ID—can be either the internal CSRHub ID, the official CSRHub name, the company alias or the company name variant (uppercase and lowercase letters in the name makes no difference).
city	The name of a city.
country	The name of a country. Note there are some special cases such as "USA" for the United States, "South Korea" for the Republic of Korea, etc.
date	The date of a data set—always in format YYYY-MM-01.
dse	The text used to describe an element of data in a given data source.
dsn	The name of a data source (uppercase and lowercase letters in the name have different meanings).
flag	The flag name (uppercase and lowercase letters in the name have different meanings).
ind	The name of an industry.
indgroup	The name of an industry group.
letter	First letter (or number) of a company name (used in search).
operator	Arithmetic operators (used in search).
parameter	Parameter (see list at bottom of sheet)
pid	The id number of a user's profile.
rated	Indicates if a match includes fully rated, partially rated, and/or not rated entities.
rating name	Used to specify which rating is being filtered in a search.
region	Geografic region name.
searchstring	A string of text that can be translated into an official CSRHub name.
specialissue	CSRHub special issue.
state	State (abbreviated for USA, Canada, and Australia).
subcategory	CSRHub subcategory.
